Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The lowest category does not mean 'no risk'. Some risk will still be present in funds with a risk and reward rating of 1.
- The Fund is in this category as it invests in a wide range of company shares, which carry a degree of risk.
- Investments can fall in value. You may get back less than you invest.
- Investments in India carry greater risks than investments in more traditional western markets. This may result in large falls in the Fund's value over short periods of time.
- Due to entry charges, you are less likely to see growth, or get back the amount invested, in the first few years.
- The value of your money will be eroded by inflation.
- Changes to currency exchange rates may cause the value of the Fund to fall, sometimes by a large amount.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.25%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.
