IFSL MARLBOROUGH MULTI-CAP GROWTH

This fund takes an unconstrained approach and can invest in businesses of all sizes, although Richard Hallett, manager since 2005, won't invest in any stock worth less than £100m. The portfolio typically holds between 40–50 stocks, with a one-in, one-out limit and each stock taking a maximum of 4% of the portfolio. Richard doesn't make big macroeconomic calls, but looks at individual firms and their prospects for the next two to five years. He buys firms that can grow regardless of the economy and avoids cyclical businesses.

IFSL MARLBOROUGH UK MICRO CAP GROWTH

This fund has one of the best track records in the industry. Guy Feld & Eustace Santa Barbara are co-managers of this fund, while veteran founder manager Giles Hargreave stepped back from his fund manager role in January 2021. The team are some of the best small-cap investors in the country and invest in a well-diversified portfolio of companies at the bottom of the market, below £250m in size. They have a growth bias, looking for those companies which are leaders in their niche markets or can disrupt existing markets. These companies will be in a variety of different sectors and industries, creating a portfolio of over 200 names. The managers will let their success stories run, potentially even adding to them if there is still upside.

JOHCM UK DYNAMIC

Alex Sawides has been running this fund since launch. The process, which he built himself, aims to exploit periods of share price underperformance, where the reasons for the underperformance are well understood and he believes there is a catalyst for change. Ideas come from three sources, which are corporate restructuring, hidden growth and recovery situations. Once his view is accepted by the market and becomes consensus, he will often sell. Also, all companies need to have a yield or prospective yield, which does provide an element of safety. The fund will have at least 50% in the FTSE 100 and stocks are typically held for two years.

Nick Train is one of the UK's best-known fund managers. He is famous for his 'buy and hold' philosophy and long-term approach. The fund is uncompromising and only invests in the highest quality companies. Nick's portfolio is typically very concentrated with over 70% of the fund's value in its top 10 holdings and it is therefore very different from its benchmark. For this reason, investors should expect performance to be different from the index.

This UK multi-cap fund is a 'best ideas' portfolio, which encompasses any stock regardless of size or sector. However, there will usually be around 50% in small and mid-cap stocks. The managers, Anthony Cross and Julian Fosh, look for firms with 'intellectual capital' or strong distribution networks, recurring revenue streams and products with no obvious substitutes. They also like to invest in companies where management teams have a significant personal equity stake. The fund is concentrated with 40-50 stocks.

MI CHELVERTON UK EQUITY GROWTH

Fund manager James Baker puts his extensive experience of investing in small and medium-sized businesses into practice with this fund, choosing to invest the majority of the portfolio in highly cash-generative smaller companies able to fund their own growth. James is supported by co-manager Edward Booth. The initial screening process considers all UK stocks below the FTSE 100, with the managers looking for: revenue growth; cash conversion; balance sheet strength; high gross margins and the ability for companies to fund themselves. Stocks must meet four out of the five criteria to pass the screen, leaving about 250 stocks to analyse further.

The notion that the discipline of paying dividends leads to greater corporate responsibility, which in turn leads to share price outperformance, is the investment philosophy behind this fund. The process is bottom-up and value driven. The fund has around 50 stocks, typically held for three years, and Stuart predominantly invests in developed markets. Manager Henry Dixon has an unconstrained mandate, allowing him to invest across the market-cap spectrum. Henry has a clear and repeatable process, targeting stocks with good cash generation, trading below the replacement cost of their assets i.e. 'value' stocks. Initial stock screens are combined with bespoke in-house models to highlight stocks for further research. Henry also has the flexibility to invest in a company's bonds if he believes they offer better value than its shares. He will have 40-60 holdings and a yield typically above 4%, which pays monthly.

TB EVENLODE INCOME

Long-term thinking is key for this fund. Managers Hugh Yarrow and Ben Peters believe the market gets obsessed with short-term factors and overlooks key fundamentals. Their stocks will typically have difficult-to-replicate business models, strong positioning in their markets and low borrowings. They will never invest in highly capital-intensive areas such as mining or oil and gas. As such, the fund often performs well in down markets. While not the highest-yielding fund, its compounding approach has allowed a consistent and growing payout level from a very concentrated portfolio. Income is paid in February, May, August and November.

TB GUINNESS GLOBAL EQUITY INCOME

Co-managed by Dr Ian Mortimer and Matthew Page, this fund has an equally-weighted portfolio of 35 stocks to generate a modest income alongside capital growth for investors. The managers are unconstrained by any benchmark and can therefore invest wherever they see the best opportunities. They have a well-defined process, focusing only on firms which are generating returns above their cost of capital, and which are generating good cashflows. This allows them to pay a sustainable dividend, as well as reinvesting in growing their business. Stocks will also need to show an attractive valuation opportunity, meaning the portfolio will be a balance of styles and be able to weather a variety of market conditions. Income is paid in January and July.

EUROPE

BLACKROCK EUROPEAN DYNAMIC

Giles Rothbarth took over sole charge of the fund in January 2020, after Alistair Hibbert stepped down as lead manager, and he runs it with the same conviction and flexibility, being prepared to have large over and underweight positions at both the stock and sector level. The fund primarily focuses on large-cap companies, though can hold some more medium-sized stocks, and will move between different styles depending on the stock and economic backdrop. This means turnover can often be higher than its peers and the portfolio is concentrated, with around 50 holdings. Giles has the support of BlackRock's very well-resourced European equity team, which we consider to be one of the best around.

He is looking for firms on the right side of disruption, those which will benefit from new technological or societal trends such as online shopping or increasing healthcare demand. However, he may take exposure to this through slightly different angles, such as copper miners for technology rather than manufacturers themselves, depending on where the best valuation opportunities lie at the time. GLOBAL

FIDELITY GLOBAL SPECIAL SITUATIONS

Manager Jeremy Podger is a pragmatic bottom-up stock picker who does not stick too rigidly to one particular investment style. His investments fall into one of three buckets. Corporate change – shorter-term investments which take advantage of corporate restructuring or initial public offerings (new stocks coming to the market). Exceptional value – cheap stocks which have the potential to grow earnings. Unique businesses – companies with a dominant position within their industries which should be able to grow for many years to come. The resulting portfolio is a well-diversified mix of around 70 to 130 different stocks.

JANUS HENDERSON STRATEGIC BOND

Managed by long-standing managers Jenna Barnard and John Pattullo, this fund is one of the more aggressively managed strategic bond funds. The managers can invest across the fixed income spectrum, but can also invest in synthetic fixed income securities (i.e. preference shares) and equities. In addition, the managers have the freedom to vary the source of their returns between income or capital growth. This means the fund can take short positions to enhance returns or protect capital. Income is paid in March, June, September and December.

The Chelsea Risk Rating Least risky 1 ||||| 10 Most risky

This is our proprietary rating to aid you in your fund choice. Our research team assesses the overall risk of a fund by analysing a number of factors including: the level of risk involved in the region/sector in which the fund invests; the size of the companies within the fund; the number of stocks held; the risk controls imposed by the manager; the use of derivatives and currency issues.

We then assign a Chelsea Risk Rating to the fund, with 1 as the lowest risk and 10 the highest. See page 31 for further details.

M&G EMERGING MARKETS BOND

Another star of the highly-regarded M&G fixed income desk, is manager Claudia Calich, who is extremely knowledgeable about her asset class. With this fund, Claudia has the flexibility to invest across the whole emerging market bond spectrum. She can invest in both government and corporate bonds, denominated in local currencies or in US dollars ('hard' currency). Claudia pays considerable attention to the macroeconomic environment to determine the framework for the fund, before looking at the individual companies and governments to pick what she believes to be the best mix of bonds for this portfolio. NOMURA GLOBAL DYNAMIC BOND (HEDGED)

With an unconstrained approach, Dickie Hodges utilises the full range of bond and derivative securities available to him, including government, corporate, emerging market and inflation-linked bonds. Using a blend of top-down and bottom-up stock selection, he aims to deliver a yield of around 3-6%, depending on market conditions. The team also target capital growth so will not increase the yield of the fund at the expense of capital. Dickie is extremely knowledgeable about bond securities and derivatives and uses this skill set and flexible mandate to exploit opportunities. The fund is a good option for all market conditions in terms of both yield and capital return.

RATHBONE ETHICAL BOND

This fund has been an early pioneer in the ethical fixed income space, and has the credentials to back it up, with manager Bryn Jones having been at the helm for more than 15 years. The fund has clear ethical exclusions, including mining, arms and gambling, which removes approximately one third of the index. Every position must also have at least one positive ESG quality. Bryn is looking for a relatively high income from this portfolio of approximately 80-200 stocks. He will move his allocations depending on his confidence in the economic and political outlook, as well as tapping into any structural themes he sees developing. Income is paid in February, May, August and November.

TWENTYFOUR DYNAMIC BOND

TwentyFour was founded in 2008 by a group of leading bond managers and it specialises entirely in fixed income. This fund is their flagship product. There is no lead manager and asset allocation is decided by a 10-strong investment committee on a monthly basis. Portfolio managers are then responsible for managing their own parts of the portfolio. This is a flexible, high-conviction fund managed by a very experienced and well-resourced team. A significant portion of the fund is invested in asset-backed securities (around 20%). This makes the fund quite different from some other strategic bond funds which lack the expertise to invest in this area of the market. Income is paid in March, June, September and December.
